PROJECTS

RwarriMS — An Employee Management System

[RwarriMS](#), originally built for [Rwarri](#), was an Employee Management System to keep track of their Employees, it allowed them to submit leaves, upload documents, check-in at work and so much more on their mobiles. Although it never saw the day, it is still considered one of my best works ever. *Built with Ruby on Rails and Vanilla JS. Use PostgreSQL as a Database.*

Explosiv — A static JSX site generator

[Explosiv](#), is a static site generator for JSX content. It was built to allow small sites (or even large ones) to generate their HTML easily and fast while preserving some React-Like syntax (JSX). *Written in Vanilla Javascript in NodeJS.*

vixalien.io — A personal blog

vixalien.io or simply dotio, is a static site generator for JSX content. It was built to allow small sites (or even large ones) to generate their HTML easily and fast while preserving some React-Like syntax (JSX). *Written in Vanilla Javascript in NodeJS.*

A list of public projects is at [Github](#)

EDUCATION

I have not graduated yet (I'm 16, in 2021) hence I will only cite this source, but believe me it's as important (if not underestimated) as General Education.

The Internet

CIRCA 2016 - (WHEN I DISCOVERED THE INTERNET)

Let's be honest: What book supersedes The WWW? And personally, this is where I learned all about web dev.

SKILLS

Advanced Vanilla HTML, Javascript and CSS.

PWA, Performance Optimizations, SEO and Web Vitals. Site optimization in general.

Minimalist Web Design.

ReactJS and NextJS.

NodeJS and Ruby on Rails.

LANGUAGES

Casual English and Fluent French
